

VANGA KALYAN PRASAD

B.Tech CSE (2023–2027) | Full Stack Developer | Python | React | FastAPI

vangakalyan18@gmail.com · 7670938563 · [linkedin.com/in/kalyan-p-0135a53b6](https://www.linkedin.com/in/kalyan-p-0135a53b6) · github.com/2303A51402 · Portfolio

Full-stack developer with shipped, production-deployed projects — ready to bring that same execution to a Software Developer or GET role.

EDUCATION ●

B.Tech — Computer Science Engineering

2023 – 2027 (Expected)

SR University, Warangal, Telangana • CGPA: 7.0

Coursework: DSA, OOP, DBMS, Operating Systems, Computer Networks

Class XII — St. Peter's Central Public School

2023

Percentage: 71%

Class X — Jawahar Navodaya Vidyalaya

2021

Percentage: 91%

TECHNICAL SKILLS ●

Languages

Python

Java

C

JavaScript

Backend & API

FastAPI

REST APIs

SQLAlchemy

Uvicorn

Frontend

React

Vite

Tailwind CSS

HTML5/CSS3

Database

MySQL

SQL

SQLite

PostgreSQL

Tools & Deploy

Git

GitHub

Render

Netlify

PROJECTS ●

Job Market Analytics Dashboard — Full Stack (FastAPI + React)

[Live](#) + [GitHub](#)

- Built and deployed a full-stack analytics platform with a Python FastAPI backend and React + Vite frontend.
- Designed 9+ REST API endpoints serving real-time job market statistics, salary insights, and trending roles.
- Implemented interactive data visualizations including a 30-day market trend chart using Recharts.
- Deployed backend on Render and frontend on Netlify — fully live production application.

Python

FastAPI

React

Vite

Tailwind CSS

REST API

Student Management System — Python + MySQL

github.com/2303A51402

- Designed and built a database-driven system to manage student records, attendance, and academic progress.
- Used Python for application logic and MySQL for persistent relational data storage with full CRUD operations.
- Built for instant search and filter across student ID, name, and department with sub-second response.

Python

MySQL

SQL

CRUD

TaskFlow — To-Do Web App — HTML, CSS, JavaScript

[Live](#) + [GitHub](#)

- Built a fully client-side task manager — no backend, no installs — with priority, category, and due-date logic.
- Implemented real-time search, filtering, a live progress bar, and automatic overdue detection.
- Deployed live on GitHub Pages with persistent state via localStorage across browser sessions.

HTML5

CSS3

JavaScript

localStorage

CERTIFICATIONS ●

- Python Programming** — Core Python development and best practices
- Web Development Basics** — HTML, CSS & JavaScript fundamentals
- Dynamic Programming Workshop** — Competitive programming and algorithmic thinking

HACKATHONS ●

- Participated in 3+ hackathons, collaborating under time constraints to design, build, and present working prototypes.

KEY STRENGTHS ●

- Full-stack execution — took a project from API design through to a live, deployed production app.
- Comfortable working across the stack: backend logic, frontend UI, databases, and deployment pipelines.
- Builds under pressure — 3+ hackathons collaborating in fixed-time, fast-iteration environments.
- Self-directed learner — picked up FastAPI, React, and deployment tooling outside the classroom to ship real work.
